February 20, 2026

Dear Landowner:

As a part of its vegetation management program, **Great Lakes Energy** has scheduled the herbicide treatment described below for its distribution system in Otsego Lake Township. A records search indicates this line crosses your property in Otsego County.

So that we are assured of complete notification and that we may answer any questions you may have, we prefer to speak with each property owner in person. To date, we have been unable to reach you at the property or by phone. **Would you please take a moment to call or email us to verify you received this notice?** We can also answer any questions you may have at that time. Thank you for your cooperation.

-GREAT LAKES ENERGY NOTICE-

As a follow-up to re-clearing of trees and brush performed recently, a low-volume herbicide application has been scheduled for the power line right-of-way crossing your property. The foliar herbicide mix will be applied as a hand spray treatment, selectively treating re-sprouting new growth of trees and brush as needed throughout the right-of-way.

Crop areas, gardens and residential mowed yard areas will be avoided. It is our intent to minimize impact to properties along the right-of-way as a part of our vegetation management program.

The herbicides that will be used are Garlon 3A, (Active Ingredient: Triclopyr), Milestone (A.I.: Aminopyralid), Escort (A.I.: Metsulfuron), Arsenal (A.I.: Imazapyr), applied with water (94%) as a diluent. Please keep people and pets off the treated area until sprays have dried. There are no restrictions on your use of the treated area after the material has dried on the plant.

All applications in this area will be completed by October 1st of this year. We expect to be on your property in the month of August.

Thunder Bay Tree Service, LLC has been contracted to perform this work. Any questions you may have should be directed to:
